

Innovation potential of research infrastructures

The Canadian experience

2nd International Conference on Research Infrastructures
Athens, Greece – 2-4 April 2014

Gilles G. Patry

President and CEO – Président-directeur général

THE CANADA FOUNDATION FOR INNOVATION

Created by the Government of Canada in 1997, the Canada Foundation for Innovation (CFI) has a legislated mandate to build our nation's capacity to undertake world-class research and technology development that benefits Canadians.

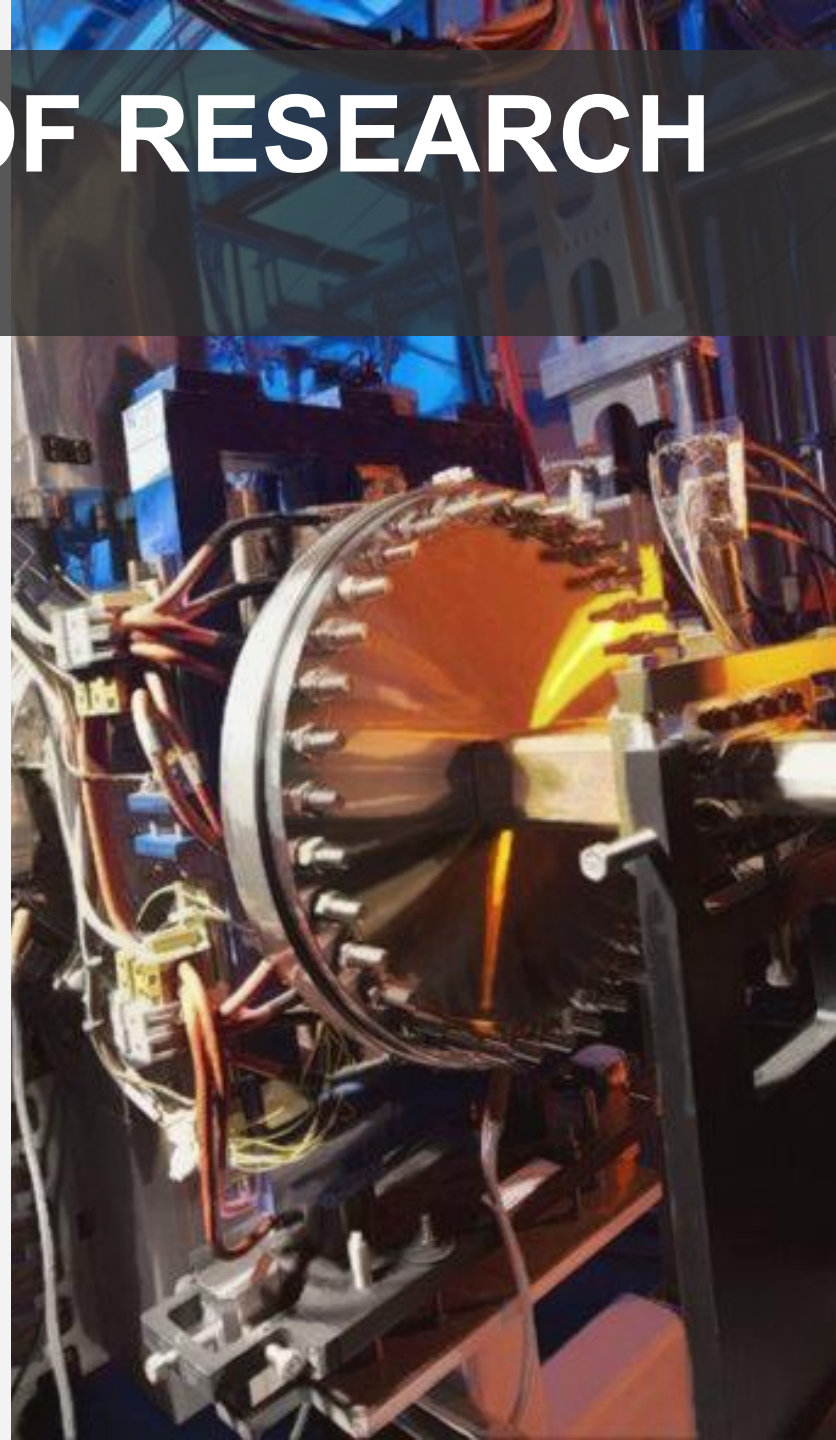

The CFI fulfills this mandate by investing in the research infrastructure necessary for Canada's leading researchers to discover, develop and apply new knowledge in all areas of science, the humanities, health, engineering and the environment.

THE IMPORTANCE OF RESEARCH INFRASTRUCTURE

The existence of the CFI is based on the premise that ...

You can't do world-class research without access to state-of-the-art research tools, equipment and facilities.

Research infrastructure is the cornerstone of research and innovation.

THE CFI MANDATE and MODEL

Our mandate is to:

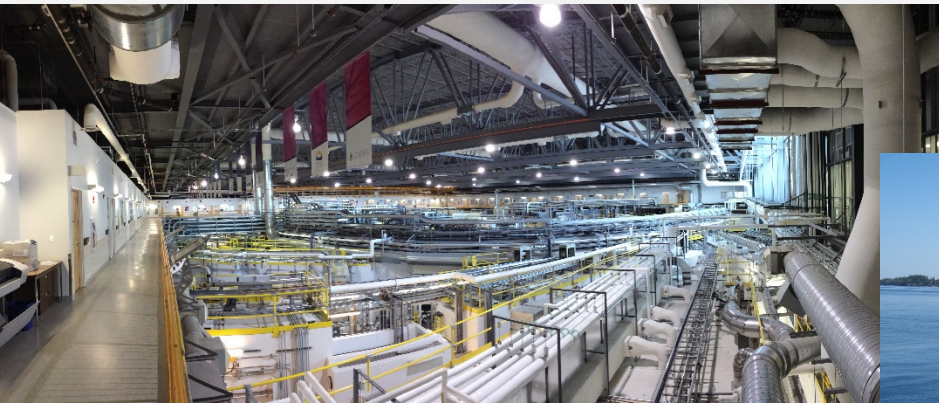

Enhance the capacity of ultimate recipients to:

- a) attract and retain the world's top research talent;
- b) enable researchers to undertake world-class research and technology development that lead to social, economic and environmental benefits for Canada;
- c) train the next generation of researchers; and
- d) support private sector innovation and commercialization.

Our model

- a) provides 40% of infrastructure costs (with remainder provided by provinces, institutions and private sector);
- b) supports all areas of research;
- c) awards based on merit and excellence;
- d) CFI promotes the development of shared research facilities
